Dear Sisters,

My name is Holli Hartman, and I am putting myself forward as a candidate for the Tau Beta Sigma Board of Trustees. Tau Beta Sigma was a huge part of my life as a college student at the University of Kansas, *both* times I attended. Without it and the wonderful sisters (active and alumni) whom I have gotten to know over the past 30 years, I would never have been as successful on my journey as I am. They helped to get me to this new chapter of my life, and it is now my time to return the favor.

I was initiated into the Zeta Delta chapter in November 1989. From 1989 to 1996, I held several chapter offices, served for a year as Midwest District First Vice President, and served twice as our chapter's national convention delegate. I graduated from the University of Kansas with my bachelor's degree in anthropology in 1996, from George Washington University with my master's degree in legislative affairs in 2006, and then returned to KU in 2011 to earn a bachelor's degree in civil engineering in 2014. During my second stint at KU, I again became involved with Tau Beta Sigma, getting to know and working with the current Zeta Delta chapter (as well as many new Midwest District and National folks) and alumni, joining the Midwest District Alumni Association, the Tau Beta Sigma Alumni Association, and becoming a Life Member. I was honored to be initiated as an Honorary of the Midwest District in 2018. Currently, I work as a Staff Engineer 2 in Transportation and Road Design for CDM Smith in Indianapolis, IN where, in addition to my engineering duties, I serve as the unofficial social organizer.

I believe that I bring a wide variety of skills from my years of schooling and highly varied career history. I am very organized and good at bringing together data and information. Having worked in a variety of offices and industries, I have become experienced in asking questions about processes and goals and determining their effectiveness and efficiency. I am also good at taking the ideas and creativity of others and figuring out how to implement them, turning them into concrete projects with end products. Though my work history and, especially, through engineering school and work, I have gained a great deal of experience in working as a part of a team on projects, organizing people and assignments, following through on tasks, and meeting deadlines.

As a member of the Board of Trustees and dealing with the business of the sorority, alumni who donate, and alumni who are becoming new donors or who are volunteering in new ways, I believe I would bring a unique perspective to the table. I have the professional know-how of several years' experiences from a variety of jobs like many of our older alumni, but am also a relatively recent graduate, starting out on a new career and life like many of our younger alumni. I think that this differing perspective could be of great value to our Board and sorority.

In the bond,

Holli Hartman
